

MESSAGE FROM
ALEXANDER TZANG — NATIONAL PRESIDENT

The world in general, and Hong Kong in particular, is in an age when the demand of great leadership is increasing daily. Leadership in various fields is required to lead the ordinary public in facing and solving problems which we are confronting with to-day. A leader is one who has the foresight to see the future, has the courage and intelligence to act, and has the ability to convince the public to accept and follow his philosophy. This kind of leadership, displayed by leaders in various fields, has made the growth of money and happiness from bare rocks and sea water possible in this city we live in. This kind of leadership has given Hong Kong the prosperity we all are enjoying to-day. It is THIS kind of leadership the Jaycees can culture and provide. And it is THIS kind of message the Jaycees in Hong Kong should put across to the general public.

Too little people in Hong Kong realize that the Jaycees is NOT just another service club. Less still are people who realize that Jayceeism provides the basic training tool and opportunity for citizens of to-day to learn their way to becoming leaders of to-morrow. As a result of such, too little young people in our community have been offered the chance to become Jaycees.

The 1974 administration, realizing this, has determined that our goal for 1974 would be

- to identify ourselves to the public of what we really are — a leadership training organization;
- to consolidate ourselves, internally, so as to set an example to the outsiders on how the future leaders work and contribute; and
- to offer more opportunities to more young people in this city to become Jaycees so that they, too, could eventually contribute to building a better to-morrow.

Through this message, I call upon my fellow Jayceettes and Jaycees to positively contribute toward the achieving of our common goal. Also through this message, I sincerely request our non-Jaycee friends to help building a better to-morrow by acting to-day, either through your own participation in the Jaycee movement or by introducing your friends to become one of us.

I wish you all good health and success.

Alexander Tzang
National President

Hong Kong, 5 January, 1974.
